

CLEARTREAT

a product that protects the environment

Clartreat®

<u>Series</u>	<u>Use</u>
1000	Powdered material to increase solids concentration of waste stream and enhance flocculation efficiency
1040	Fine granular material same use as 1000
1200	Granular material; same use as 1000
2000	General treatment; Suspended solids, dissolved metals broken oil emulsion, vehicle washing solutions
2004-G	Granular material; Same use as 2000
2050-G	Low dusting granular material; Ink, dyes, truck washes broken oils & greases
2051-G	Granular material; Ink, dyes & broken oils
2055-G	Granular material; Paint, ink, dyes & oils
2100	Ink, dyes, some vehicular washes, greases, oils
2104-G	Granular material; Same use as 2100
2150	Water based paints, die cast release
2154-G	Granular material; Same as 2150
2160	Enamel paints, operates at a higher pH
2160-G	Granular material; Same use as 2160
2161-G	Granular material; Paints, slightly different than 2160
2200	Automotive washes, soaps, surfactants, suspended solids
2204-G	Granular material; Same use as 2200
2300-G	Granular material; metal plating, chelated metals, operates at higher pH
2305-G	Granular material; Metal parts washing, operates at higher pH
2307-G	Granular material; Soapy waste steams
2310-G	Granular material; Metal auto parts manufacturing
2311-G	Granular material; Alkaline cleaners, soaps & oil
2350-G	Granular material; Phosphate removal, oils, greases
2360-G	Granular material; Phosphate, oils and greases
3111	Cationic flocculant, granular
3112	Anionic flocculant, micro-bead
3113	Anionic flocculant, granular powder
3121	Cationic coagulant, micro-bead
