

CLAYMASTER®

Clay Inhibitor

Show Clay Who's Boss.

CLAYMASTER® is a concentrated, nonhazardous, proprietary clay inhibitor that can be used with either polymer or bentonite viscosifying systems. It keeps clay cuttings from sticking to each other and drilling tools while reducing or even eliminating swelling of the bore. Using CLAYMASTER® will significantly reduce rotation and pullback pressures, easing wear and tear on your tooling.

- For sticky and swelling clays, use 2 to 4 quarts per 500 gallons depending on water sensitivity of the formation.
- For maximum effectiveness, CLAYMASTER® should be used starting with the pilot hole and all reaming and pullback stages. Clays begin swelling and absorbing water immediately upon contact with water starting with the pilot hole. CLAYMASTER® will eliminate or greatly reduce this problem.

Characteristics

Appearance: Clear Liquid

Specific Gravity: 1.01

Solubility: Soluble in Brine & Fresh Water

Weight: 4.3 lb/pouch

USE WITH POLYMER OR BENTONITE VISCOSIFYING SYSTEMS.

- Keeps clay cuttings from sticking
- Reduces swelling of the bore
- Reduces rotation/pullback pressures

Same Big Performance. New Smaller Size.

Our proven Wyo-Ben® **CLAYMASTER®**, **DRILL-X™ HP**, **WYO-VIS® HP**, and **WYO-LUBE™ RR** are now available in small, easy-to-handle, 64-oz pouches.

Perfect for smaller bores, the new no-mess packaging makes mixing easy and minimizes waste. But while the packaging is new, the products are the same tried-and-true Wyo-Ben solutions trusted for years on the largest bores. These quick-mixing, field-proven fluids make every bore more effective and efficient, protecting your equipment and boosting your productivity. And since quality Wyo-Ben products are highly concentrated, you can always do more with less, saving you money in the long-run. Get the proven Wyo-Ben performance you need ... now in a smaller, easier to handle package!
