

DRILL-X™ HP

Drilling Detergent And Wetting Agent

Boost Your Fluid's Performance.

Our high performance **DRILL-X™ HP** is a thinning drilling detergent and wetting agent for use in fresh water drilling fluid systems where clays are present. Environmentally safe, non-toxic, and biodegradable, DRILL-X™ HP can be added to fluids to keep bits and tooling clean while enhancing lubrication properties in the system. DRILL-X™ HP also acts as a secondary thinner to lower fluid viscosity and aid in dispersing clays. When drilling through clays, adding DRILL-X™ HP will make clays more flowable, preventing cuttings from sticking together.

- For lubrication and bit cleaning, add 3 to 4 quarts per 500 gallons of drilling fluid.
- To disperse clays and improve fluid loss, add 4 to 5 quarts per 500 gallons of drilling fluid.

Characteristics

Appearance: Reddish Liquid

Specific Gravity: 1.01

Solubility: Soluble in Fresh Water

Weight: 4.3 lb/pouch

USE IN FRESH-WATER DRILLING FLUID SYSTEMS WHERE CLAYS ARE PRESENT.

- Keeps tooling clean
- Enhances system lubrication
- Lowers fluid viscosity
- Makes clays more flowable, prevents sticking

Same Big Performance. New Smaller Size.

Our proven Wyo-Ben® **CLAYMASTER®**, **DRILL-X™ HP**, **WYO-VIS® HP**, and **WYO-LUBE™ RR** are now available in small, easy-to-handle, 64-oz pouches.

Perfect for smaller bores, the new no-mess packaging makes mixing easy and minimizes waste. But while the packaging is new, the products are the same tried-and-true Wyo-Ben solutions trusted for years on the largest bores. These quick-mixing, field-proven fluids make every bore more effective and efficient, protecting your equipment and boosting your productivity. And since quality Wyo-Ben products are highly concentrated, you can always do more with less, saving you money in the long-run. Get the proven Wyo-Ben performance you need ... now in a smaller, easier to handle package!
