

TORQMASTER®

Product Information

Description

TORQMASTER® is a concentrated torque reducing surfactant that has the unique ability to break clay formations. Application rates are very low making it a cost-effective fluid additive for drilling clay, shale and mixed clay formations. Significant reductions in rotary torque and drag have been observed when using **TORQMASTER®** in problematic clays and shale. **TORQMASTER®** is a very low foaming additive that is compatible with all water-based drilling fluid systems.

Characteristics

- Appearance: Viscous Liquid
- Color: Red
- Odor: Slight Citrus
- Specific Gravity: 1.035
- pH: 10.0
- Solubility: Completely Soluble in Water

Application

- For sticky and swelling clays use 1 to 2 gallons per 1,000 gallons.
- For unknown or mixed formations, use 1/2 gallon per 1,000 gallons.

Packaging

TORQMASTER® is available in 5 gallon pails or 55 gallon drums.
