

WYO-LUBE™ RR

Product Information

Description

WYO-LUBE™ RR is a premium drilling fluid lubricant designed for HDD, rotary drilling and mining industries. The superior lubricating properties reduces torque and drag, increases penetration rates, extends the life of drill rods and bits by reducing wear. **WYO-LUBE™ RR** mixes easily and is not affected by brackish or harsh water conditions. Using **WYO-LUBE™ RR** as a drilling fluid additive allows the drilling rig to be used at maximum potential and provides the operator an increased level of control.

Characteristics

- Reduces friction – drag and torque
- Increases penetration rates
- Increases control when steering
- Mixes easily
- Extends the life of rods, bits and equipment

Physical Properties

- Low viscosity liquid
- Dark in color
- Specific gravity - approximately 0.905
- Weight - 7.53 lbs. per gallon

Application

For normal system treatment maintain a dosage of **1 – 4 quarts per 100 gallons**. (Up to 1% by volume) It may be necessary to increase addition rates when high torque or drag is encountered, up to 2% by volume. **WYO-LUBE™ RR** should always be the final product added.

Packaging

WYO-LUBE™ RR is packaged in 5 gallon plastic pails.
