

# WYO-LUBE™ RR

Drilling Fluid Lubricant

## Maximize Your Rig's Potential.

**WYO-LUBE™ RR** is a premium drilling fluid lubricant designed for HDD, rotary drilling and mining industries. Its superior lubricating properties reduce torque and drag, increase penetration rates, and extend the life of drill rods and bits by reducing wear. WYO-LUBE™ RR mixes easily and is not affected by brackish or harsh water conditions. Using WYO-LUBE™ RR as a drilling fluid additive allows the drilling rig to be used at maximum potential and provides the operator an increased level of control.

- For normal system treatment, maintain a dosage of 1 – 4 quarts per 100 gallons (up to 1% by volume). It may be necessary to increase addition rates when high torque or drag is encountered (up to 2% by volume). WYO-LUBE RR should always be the final product added.

## Characteristics

**Appearance:** Dark Liquid

**Specific Gravity:** Approximately 0.905

**Solubility:** Soluble in Brine & Fresh Water

**Weight:** 3.95 lb/pouch

**USE IN HDD ROTARY DRILLING AND MINING INDUSTRIES.**

- Reduces drag and torque
- Increases penetration rates
- Protects drill rods and tooling

# Same Big Performance. New Smaller Size.

Our proven Wyo-Ben® **CLAYMASTER®**, **DRILL-X™ HP**, **WYO-VIS® HP**, and **WYO-LUBE™ RR** are now available in small, easy-to-handle, 64-oz pouches.

Perfect for smaller bores, the new no-mess packaging makes mixing easy and minimizes waste. But while the packaging is new, the products are the same tried-and-true Wyo-Ben solutions trusted for years on the largest bores. These quick-mixing, field-proven fluids make every bore more effective and efficient, protecting your equipment and boosting your productivity. And since quality Wyo-Ben products are highly concentrated, you can always do more with less, saving you money in the long-run. Get the proven Wyo-Ben performance you need ... now in a smaller, easier to handle package!

**CLAYMASTER®**

**DRILL-X™ HP**

**WYO-VIS® HP**

**WYO-LUBE™ RR**
