

WYO-VIS® HP

Clay Inhibitor and Viscosifier

Get High Performance At Low Addition Rates.

WYO-VIS® HP quickly builds viscosity and shields clay and shale formations. Typical treatment levels for fresh-water drilling fluids are 0.25 to 1.5 quarts/100 gallons of water, depending upon the desired viscosity or level of shale stabilization required. WYO-VIS® HP builds sufficient viscosity drilling fluids to effectively clean the hole. It also stabilizes problem shale and imparts friction-reducing properties to the fluid. For best results, mix EXTRA HIGH YIELD™ to a funnel viscosity of 35–40 seconds/quart then add WYO-VIS HP to bring viscosity to 45–50 seconds/quart.

- For addition during air drilling operations for shale stabilization or stiff foam, mix at 0.25 to 0.75 quarts/100 gallons of water and use with AIR FOAM® and WYO-FOAM™ 800.
- WYO-VIS® HP can be thinned/broken down with sodium hypochlorite (bleach). When purging the hole and sanitizing well, treat with Clorox® at a rate of 1 to 1 1/2 gallons/100 gallons of drilling fluid.

Characteristics

Appearance: White, Viscous Liquid

Specific Gravity: 1.08

Solubility: Soluble in Fresh Water

Weight: 4.2 lb/pouch

USE IN CLAY AND SHALE FORMATIONS.

- Builds viscosity fast
- Reduces torque
- Shields swelling clays
- Prevents bit balling

Same Big Performance. New Smaller Size.

Our proven Wyo-Ben® **CLAYMASTER®**, **DRILL-X™ HP**, **WYO-VIS® HP**, and **WYO-LUBE™ RR** are now available in small, easy-to-handle, 64-oz pouches.

Perfect for smaller bores, the new no-mess packaging makes mixing easy and minimizes waste. But while the packaging is new, the products are the same tried-and-true Wyo-Ben solutions trusted for years on the largest bores. These quick-mixing, field-proven fluids make every bore more effective and efficient, protecting your equipment and boosting your productivity. And since quality Wyo-Ben products are highly concentrated, you can always do more with less, saving you money in the long-run. Get the proven Wyo-Ben performance you need ... now in a smaller, easier to handle package!

CLAYMASTER®
