

MUD SCHOOL

September 12 – 16, 2022

The MUD SCHOOL objective is to address the basics of Drilling Fluid technology. Participants will understand how drilling mud can contribute to a smooth drilling operation, whether drilling vertically or horizontally. Clay chemistry, fluid dynamics, polymer usage, as well as grouting and hole abandonment will be discussed. The purpose is not to make “mud engineers” out of attendees, but rather to give them the mechanics for manipulating drilling fluids as a tool to achieve the most productive results!!

DRAFT AGENDA

MONDAY

WYO-BEN Corporate Office - Billings, MT

- Introductions and Welcome
- Bentonite 101
- Drilling Fluids: Their Purpose & Make-up
- Common Drilling Conditions & Problems
- Drilling Demonstrations
- Dinner

TUESDAY

WYO-BEN Corporate Office - Billings, MT

- Polymer Additions and Alternatives
- Solids Control
- Laboratory testing
- Dinner

WEDNESDAY

WYO-BEN Greybull & Lovell Plants, WY

- Travel to Lovell & Greybull, Wyoming
- Tour Mines and Plant
- Sightsee at Big Horn Canyon
- Check in at Motel and Dinner

THURSDAY

WYO-BEN Greybull Plant, WY

- Grouting and Hole Abandonment
- Outdoor Practicum: Hole Sealing & Grouting
- Travel to Cody, Wyoming
- Check in at Motel and Dinner

FRIDAY

Cody, Wyoming & WYO-BEN Billings, MT

- Final Session: Theoretical Drilling Operation and Mud Programming
- Tour Buffalo Bill Museum
- Travel to Billings, Montana
- Final Banquet

MUD SCHOOL

September 12– 16, 2022

REGISTRATION
Fee \$1785.00
