

WYO-FOAM™ 800

Certified to
NSF/ANSI/CAN 60

Product Information

Description

WYO-FOAM™ 800 is a foaming agent for use in mineral exploration, HDD, water well, and seismic drilling operations. It is a highly concentrated foamer generally requiring 30% less of the application rate of most other foaming agents. It generates very tiny tough bubbles which aides in transporting cuttings effectively from the hole.

Characteristics

- Biodegradable
- Aids in drilling of unstable zones
- Easily carries cuttings to surface
- Reduces bit balling and packing
- Cuts down on dust during air drilling operations

Application

- For mist applications add 0.5 to 2.5 quarts per 100 gallons of make-up water.
- In loss circulation areas add 1.0 to 2.0 quarts per barrel.
- Stiff foam - After mixing .5 to 1.0 quarts of **WYO-VIS®** Polymer per 100 gallons of make-up water, add **WYO-FOAM™ 800** at a rate of 2 to 4 quarts.
- Mud misting - Add .5 to 2 quarts to a bentonite slurry that has a viscosity of 36 to 38/sec.

Packaging

WYO-FOAM™ 800 is packaged in 5 gallon, 55 gallon drums, and 240 gallon totes.
